

From the desk of Ivy Bray
Minister for Foreign Affairs
Office of Global Affairs

The nation of Yemen (Houthis), our goal is to legitimize ourselves as the true rulers of Yemen and dominate the region alongside allies in Iran. We believe that our movement represents the interests and sovereignty of Yemen and that our authority should be recognized by the international community. We value independence, regional influence, political strength, and the protection of our national interests. We seek to establish ourselves as a legitimate governing power while strengthening our political, economic, and diplomatic relationships with our allies.

As a representative of the Houthis, we consider challenges to our authority and threats to regional influence as our biggest concerns. We believe Yemen deserves the right to determine its own future without outside influence.

In this simulation we will push for recognition of our leadership. As well as stronger diplomatic relationships with regional allies and political agreements that protect our interests. We firmly oppose all actions of intentions to undermine our authority in Yemen and our influence in the region. But we are willing to pursue diplomatic negotiations and agreements that strengthen our position in Yemen and the Middle East. Our goal by the end is to have international legitimacy and establish ourselves as a major political power in the region.
